

I am writing to urge you to reject the NAB petition 04-160. My husband and I listen to XM radio, and while we are traveling, being able to listen to weather and traffic reports of cities we are traveling to, is a matter of safety to us. We can hear these reports on XM, long before we are close enough to a city to be able to hear such a report on a local a.m. station. I am looking forward to XM adding additional cities to their programming, and hope that you will rule in their favor.

Sincerely,

Carolyn Speidel
